

145-3 Spreader for suspension strut and steering parts

DESCRIPTION

The spreaders for suspension strut and steering parts of the 145 series are used to safely and absolutely damage-free expand the mounts of suspension struts or steering parts from threads in the automotive and workshop. They are particularly suitable for gently expanding clamping fits on aluminium chassis. The small and handy design of the 145 series makes it an ideal problem solver, especially in very tight and awkward spaces.

RANGE OF APPLICATION

For safe and absolutely damage-free expansion of the mounts of suspension struts or steering parts of threads

BENEFIT

- Installation and removal of the shock strut is done in a single step and without additional effort
- Slipping of the tool is impossible due to the screw connection to the crossbar or support arm
- The ball bearing nut easily maintains the spreading forces specified by the automotive industry

OPERATION

- Mount the spreader on the part
- Firmly fix the joint by actuating the hexagon and spread the part open

MASTER DATA

GTIN	4021176001420
Country of origin	DE
Material	Tool steel
Series	145
Net weight [kg]	0,31 kg
Gross weight [kg]	
Package contents	1 piece
Packaging Act	PAP 21
